2008 Film Schedule

Dinosaurs Alive! 3D

Watch as dinosaurs come alive right before your eyes! Guided by some of the world's best paleontologists from the American Museum of Natural History in New York, uncover evidence that the descendents of dinosaurs are still with us today.

Sea Monsters 3D:

A Prehistoric Adventure

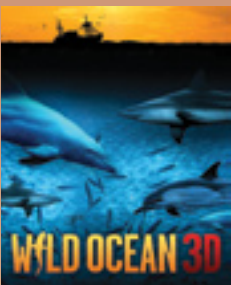

Transport back in time to the Late Cretaceous period, when a great inland ocean divided North America in two. Follow an adventurous dolichorhynchops as it travels through life's stages and watch paleontologists ancient remains that will help solve the 82 million-year-old mystery behind these prehistoric creatures.

Dolphins and Whales 3D:

Tribes of the Ocean

Dive into an adventure that takes you through dazzling coral reefs to warm depths where the surviving tribes of the ocean can be encountered. Discover their lives and habitats as never-before-seen. Experience an unforgettable voyage with these graceful and majestic, yet endangered sea creatures.

Wild Ocean 3D

Each year an unbelievable feeding frenzy takes place in the oceans. See spectacular breaching whales, feeding sharks, diving gannets and massive bait balls up-close and personal as they depict an underwater struggle for survival. These ocean animals will also reveal the economic and cultural impact made on South Africa's coastal communities.
